Objective and investment policy

Objective:

The investment objective of the Fund is long term capital growth and to exceed the performance of the MSCI World Index Total Return in GBP.

Policy:

The Fund aims to achieve its objective through investment in a concentrated portfolio of listed equity securities invested on a global basis.

The Fund will invest a minimum of 70% in equity securities of mid- and large-cap companies, being those with a market capitalisation of at least GBP 1 billion. The Fund has a performance fee which is 15% of any returns the Fund achieves above the performance of the MSCI World Index Total Return in GBP. The Fund will not be constrained in any way accordance to this benchmark.

The Fund will be managed so that it qualifies for investment by Individual Savings Accounts.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

- The lowest category does not mean 'risk free'.

- The indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is ranked as a "5" on the scale. This is because the Fund invests primarily in equity securities which can experience high rises and falls. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

The indicator above does not take account of the following risks of investing in the Fund:

- The Fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent and fail to meet their obligations, it may expose the Fund to financial loss.

- The investments of the Company are subject to normal market fluctuations and other risks inherent in investing in securities. There can be assurance that any appreciation in the value of investments will occur.

- Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques). It is not intended that the use of derivatives for investment purposes will cause the net asset value of the Fund to have high volatility however investors should be aware that the use of derivatives may cause the risk profile of the Fund to change on occasion.

- Certain securities may mean the value, sell at a desired time and place, or cease to trade altogether.

- The Fund will have a concentrated portfolio of assets with as few as 20 equity security holdings at any one time. Whilst increasing potential reward, the nature of a more concentrated portfolio can increase risk. As such, the returns may be more volatile.
